

(Fig. 3) Channel addressability: response — requested vs achieved: text, position and rotation-packet channels

v2 sampler, one route, one scene, kinematic; (b) SONIC counts are EXP-1C tracker successes at physics seed 0.

Root-height dose-response omitted: the only committed artifact (outputs/duck_response) is v1-sampler evidence (house rule 6);

the packet's root-height payload compliance is in (c).
